

Measuring for bay windows

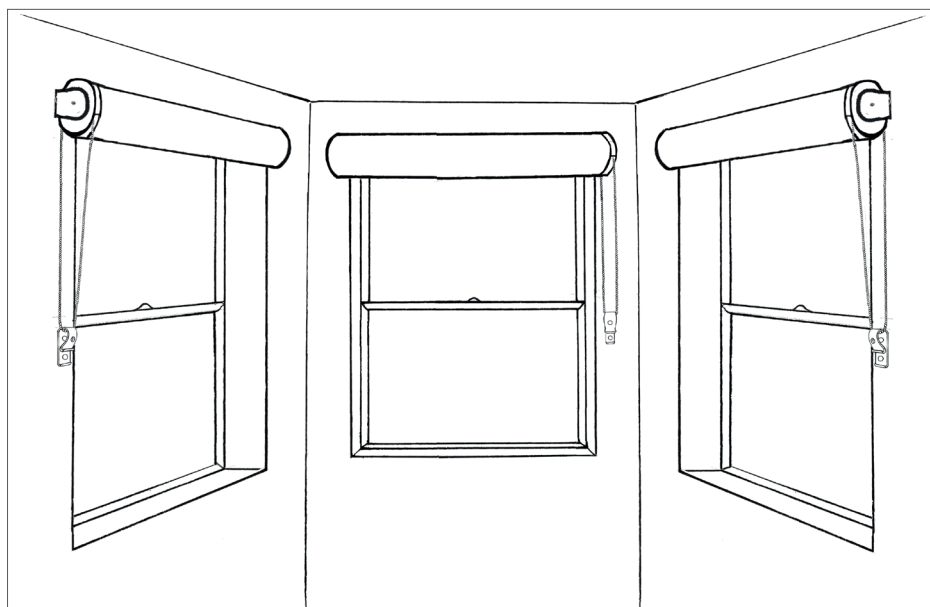

Tip: Each bay window is different - there is no one rule to measuring.

1 Curtains

If your pole or track is in place, simply follow our “how to measure for curtains” instructions advice page. If you need to fit a pole or track before measuring please call us on 0800 121 6370 for advice.

2 Roman and roller blinds

Measuring for Roman blinds or roller blinds to go in a bay can be quite complicated. You will need to deduct a certain amount from the width of each blind in order for them to move up and down properly.

We recommend that you email us at contact@loomandlast.com with your measurements and photos or call us on 0800 121 6370 for more advice.

Order online or call 0800 121 6370
